

Environmental Flowrates for Menzelet and Kilavuzlu HEPPs

According to Performance Requirement 6 of EBRD, conservation of biodiversity and sustainable management of living natural resources are fundamental to environmental and social sustainability.

Menzelet Kilavuzlu takes necessary measures during the operation phase of Menzelet and Kilavuzlu HEPPs. The environmental/ecosystem water needs to be left in the regulator site for the dam projects planned in the investigation area have been determined using different methods. Environmental Flow values are given in Table 6A, 6B and 6C.
